Technical Skills

Languages: Python, C++, Go, Dart, SQL
Tools & Platforms: REST APIs, Azure DevOps, Polarion, Git, Flutter, ESP32

Experience

Software Test Engineer (Contract) January 2026 – Present
Becton, Dickinson and Company (BD) *Irvine, CA*

- Developed test cases and executed formal test runs supporting verification of 1,000+ software requirements, maintaining traceability and regulatory compliance
- Performed end-to-end integration and regression testing across web, mobile, and medical device systems, validating software upgrade workflows
- Lead release verification and regression testing, validating software fixes and collaborating with cross-functional teams to investigate defects
- Conducted performance and load testing across multiple connected medical devices, measuring system reliability and software upgrade times

Software Developer (Intern) April 2024 – January 2025
Darwins *Irvine, CA*

- Developed Flutter mobile application features using BLoC state management and REST APIs, integrating frontend and backend workflows
- Built Python and LangChain automation to generate structured JSON and streamline task creation, reducing task creation time by 80%

Projects

ASL Recognition Glove

- Built an ESP32-based wearable integrating five flex sensors and signal filtering to recognize hand gestures
- Reduced recognition error rate by 82% through sensor calibration, software filtering, and threshold optimization

Custom E-Reader

- Developed custom e-reader firmware in C++ using PlatformIO and Arduino, implementing display control and text rendering
- Integrated an ESP32 with an e-paper display using SPI and GPIO, debugging hardware communication and refresh operations

Education

University of California, Irvine December 2024
Bachelor of Science in Computer Science *Irvine, CA*

- Awards: Dean's Honors List, Edison STEM Transfer Scholarship, UCI-OC Alliance Scholarship
